

MONGOOSE® XE MOTION ATTACHMENT

A versatile, premium solution for mounting your laptop.
Available in four sizes: 7", 9", 12" and 15" to suit a variety of users and vehicles.

Adjust your laptop with ease using the Mongoose® XE from Gamber-Johnson. Offered in four (4) different sizes, the Mongoose XE is suitable for any mobile work environment. Our Mongoose XE is paired with a versatile clevis with various mounting patterns, making it compatible with a wide variety of devices and easy to install to get you back on the road. All colored aspects on the Mongoose XE are points of movement. Pull the front handle and push/pull left or right to position the computer closer or further away for ideal user comfort. In addition, a side trigger allows the user to glide the docking station towards them giving additional movement and customization. Users will never have to worry about the Mongoose XE moving while traveling, since roughly every inch on the product features a locking point to limit travel outwards and improve stowing abilities when the device is not in use. The Mongoose XE can do more than hold your computer; it can make working from your mobile office comfortable and efficient.

Features

- Color touch points for quick adjustments
- Sleek, low profile design
- Effortless positioning
- New braking system allows for secure positioning at roughly every inch
