

INSTALLATION INSTRUCTIONS

Product

**Standard and Tall Tablet Display Mounts
7160-0761 and 7160-0831**

Revision

Rev.D

Form

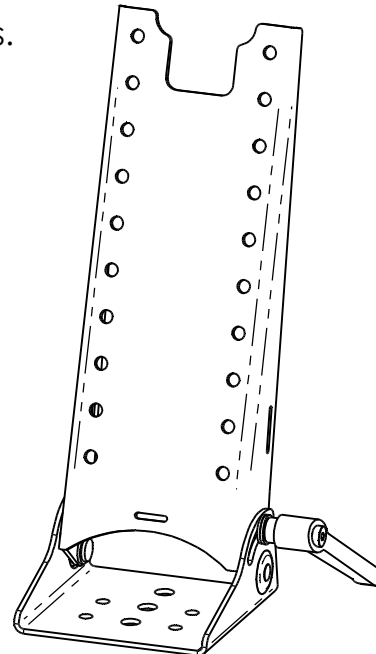

INST-720

Printing Spec:PS-001

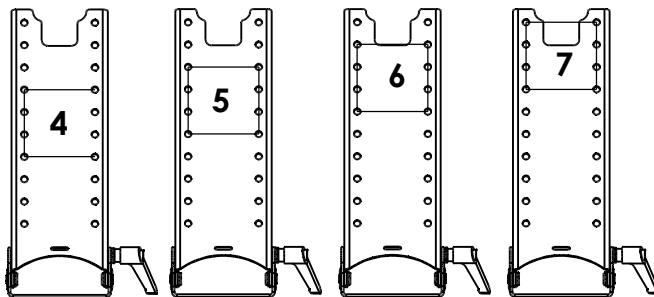

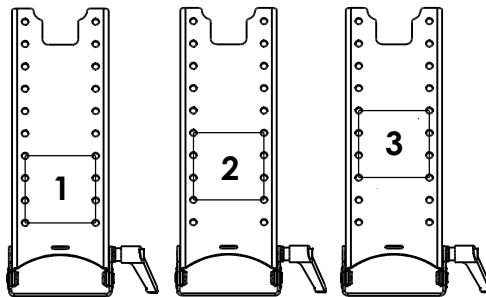

The Tablet Display Mounts have several overlapping VESA 75mm patterns which allows for mounting several different tablet docking stations and cradles.

If needed, the handle can be repositioned on the opposite side.

If the mount will be permanently used in a vertical position (not tilted forward), a .25-20 bolt can be installed and tightened on the side opposite the handle, to lock the display in position.

Attaching the mount

Use the supplied hardware to attach the mount as shown.

The Tablet Display Mounts can be mounted on any Gamber-Johnson pole or console with a 3/8" mounting hole.

Assemble the components as shown.

Tighten the bolt and Nylok nuts to get the desired amount of friction when rotating the Display Mount.

The Tablet Display Mounts can also be mounted on the G-J Mongoose® product lines.

The use of a Mongoose motion attachment allows adding a keyboard tray with ability to swivel from side to side and move forward and back.

Assemble components as shown.
